Education

University of Santander, Software Engineering, Project Management and Direction, Santander, Colombia (expected graduation) Feb 2022 - Jan 2027

- Focus on agile methodologies and development team management
- Specialization in web architectures and full-stack development

Experience

Freelance Full-Stack Developer, ALONSO LANDSCAPE SERVICE LLC, United States (Remote) Jun 2025 - Jul 2026

- Design and implementation of a project management system with separated frontend/backend architecture
- Frontend development with React and backend with Python, integrating RESTful APIs
- Version control with GitHub and deployment on CPanel
- Improved the client's operational efficiency through process automation
- Post-launch support: handled user tickets (information reported as missing or deleted, pagination issues, overlooked interface adjustments), finding the cause and fixing it

Freelance Web Developer, OPMY PACIFIC GROUP PTY LTD, Australia (Remote) Aug 2025 - Jul 2026

- Development and deployment of a corporate landing page using React
- Production management through CPanel to optimize performance and availability
- Direct collaboration with the client to translate business requirements into effective technical solutions
- Post-launch support and maintenance until Jul 2026

Projects
